

I Applications

The Hyginox SH pump is a centrifugal pump manufactured in stainless steel with steel lantern.

This pump is specially designed to meet the requirements of applications such as filtering, bottling, CIP supply, and auxiliary services in the chemical industry.

I Operating principles

Housed inside the casing, the impeller rotates in conjunction with the pump shaft. With this arrangement, the impeller blades convey energy to the fluid in the form of kinetic energy and pressure energy.

This pump is not reversible by simple reversal of the direction of rotation. The direction of rotation is clockwise when the pump is viewed from the rear side of the motor.

I Design and features

Casing manufactured with cold-formed plate.

DIN connections (standard).

Open impeller manufactured with stainless steel investment casting technology.

Mechanical seal according to DIN 24960 L1K.

Pump certified according to 3A sanitary standards.

Motor according to IEC B35 standards.

IEC B35 motors (B34 for SH-15), IP55, F-class insulation.

Open impeller

I Materials

Parts in contact with pumped media:

Gaskets (standard)

Mechanical seal (standard)

Lantern

Inside surface finishing

Outside surface finishing

AISI 316L

EPDM (FDA)

C/SiC/EPDM

GG-15

Ra < 0.8 μm

Mirror polished

I Options

Seal in C/St.St and SiC/SiC

Bareshaft construction for models SH-35 / 38.

Gaskets in FPM (Vitor®) and PTFE

Self-priming casing

Drainage connection

Connections: Clamp, SMS, RJT...

Motors with additional protection

Switchboard trolley.

AISI 304 shroud and platen

Stainless steel shroud

AISI 304 legs

I Technical specifications

Max.flow	150 m ³ /h / 660 GPM
Max.head	100 mcl / 328 ft
Max.suction pressure	4 bar / 58 PSI
Max.working temp.	120 °C / 248°F
Max.speed	3500 min ⁻¹
